

How It Works - MinusA2

Stage 1: Anti-Bacterial Electrostatic Pre-Filter (Washable):

The anti-bacterial electrostatic pre-filter is specially treated with electrostatic process. This pre-filter can effectively kill germs and trap pet hair, large size allergens and dust.

Our indoor air contains many allergens and germs:

Bacteria

Dust Mite

Fungus & Mold

Grass Pollen

Pet Dander

Tree Pollen

See how RabbitAir® MinusA2™ Air Purifier can help you remove, traps and destroy the above harmful allergens and germs from your indoor air.

CONTROL PANEL

5 Fan Speeds

Turbo - Maximum Level
Silent - Minimum Level

Speed Button

Change the fan speed level.

Mode button

Change the mode of operation.

Moodlight Switch Button

Switch the Moodlight on/off.
